ASICs - Move On To The Better Choice

Your application benefits from EPSON ASIC designs

- Higher Performance through Improved Technology
- Space saving and cost saving through higher integration
- Support of conversions of all major FPGA netlists
- Low minimum quantity orders (starting from 5,000 units)
- Low Turn Around Time for Test Sample Production from 3 weeks
- Two European Design Centers

- Leading Gate Array Technologies down to 0.25µm with:
  - IP cores (UART, LCD Contr., USB, IrDA etc.)
  - Support of one/two port RAM
  - Low Power at various voltage levels
  - Many Package Options
  - Range from 2K to 1.9m usable Gates
